

GARSINGTON
STUDIOS

[illegible]

Welcome to Garsington Studios

A purpose-built complex of studios, meeting rooms and ancillary spaces, set on a beautiful private estate in the Chiltern Hills, Buckinghamshire.

Rehearsals & Recordings

The Studios were purposely built for music recordings and rehearsals. They've been acoustically optimised, feature raised gallery walkways and benefit from both natural light and the space to bring in scenery, lighting rigs and other technical kit. Two studios are the same size as the Opera Pavilion stage, whilst a third features a sprung floor and mirror wall for movement rehearsals. Ancillary rooms include coaching, practice, production, company and fitting spaces, and a loading bay allows easy deliveries to all three major studios.

Filming & Location Support

Sitting in a quiet, yet exceptionally convenient location on the beautiful Wormsley estate, our new Studios are ideal for filming with flexible spaces to act as cast and crew support areas. Two triple height studios measuring 15m x 23m (3,714 sq ft), and a third double-height space at 10m x 16m (1,722 sq ft) have direct loading bay access, cable runs and are acoustically optimised. Each room has natural lighting but can also be fully blacked-out. The larger studios feature viewing galleries and all three studios are pillar-free!

Meetings & Conferences

Enjoy a breath of fresh air and stunning views, as you host your team away day just 40 minutes from London. Our valley location in the Chiltern Hills provides the perfect setting for bringing people together to refresh and focus the mind. Our flexible spaces mean we can host conferences for hundreds, or intimate meetings for just a few people. We can support you with catering, accommodation and transport, and even workshops that take full advantage of Garsington Opera's knowledge and experience. The whole building features excellent WiFi and we can provide car parking with electric vehicle charging points available.

Hospitality Events

Garsington Opera is known for the detail and quality of its artistic output – just imagine the kind of event we could host for you in our prestigious new Studios. Architecturally impressive, the building itself is a real talking point and our links to entertainment and hospitality services mean we can create a very special and customised event for you. Even better, hosting your event with us directly contributes to supporting our charitable and artistic mission, helping people from all backgrounds to connect with our work and their own potential.

Kia Ora Studio

Length	23 m	75.5 ft
Width	15 m	49.2 ft
Height	10 m (8.5 m to under-side of roof truss)	32.8 ft (27.8 ft to under-side of roof truss)
Area	345 sq. m	3,714.6 sq. ft.

Features:
